## 3D Systems Showcases New Dental Solutions In Chicago

– Midwinter Events Feature Latest 3D Digital Dentistry Production –

**Rock Hill, South Carolina – February 22, 2012** - [3D Systems](#) Corporation (NYSE: DDD) announced today that it will showcase its latest dental [CAD/CAM 3D Printers](#) at the Dental Society's Midwinter Meeting and LMT's Lab Day Chicago 2012. The events will be held February 23rd – 25th at McCormick Place #3243 and February 24 – 25<sup>th</sup> the Sheraton Chicago Hotel & Towers, section #121.

3D Systems will demonstrate its open architecture model printing on the [2012 ProJet™ MP 3000](#) and new [ProJet™ MP 6000](#), along with the 3Shape Dental System™ 2012 for partial denture models and frameworks. The ProJet™ MP 3000, the company's most affordable dental CAD/CAM printer for working models and drill guides, offers higher print resolution and a custom dental material for precision stone-like models with a matte finish and exceptional detail that are just perfect for crown and bridge models.

The Company also plans to showcase its newest Vidar innovation – the [Dental Film Digitizer](#) – specifically designed for scanning analog dental film. Dental professionals can now create medical quality digital images for primary diagnostic purposes from dental x-ray films and deliver full color physical models with the [ZPrinter® 250](#).

“We are pleased to share our growing portfolio of dental CAD/CAM [3D printers](#) and [dental film digitizers](#) with this important audience of leading digital dental practitioners,” said Lee Dockstader, Vice President, Business Development for 3D Systems. “We are committed to the continued innovation and democratization of dental solutions through an open architecture that delivers increased value.”

## **About 3D Systems Corporation**

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides creative content development, design productivity tools and curation services and downloads. Its expertly integrated solutions replace, displace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, communicate, prototype and produce functional parts, empowering its customers to create with confidence.
