3D Systems to Host Investor and Analyst Meeting

Rock Hill, South Carolina – May 14, 2014 – [3D Systems](#) (NYSE:DDD) announced today that it plans to hold an analyst and investor meeting on Tuesday, June 10, 2014, at 9:00 a.m. EDT at the New York Marriott Marquis in New York, NY. 3DS' senior management will review the company's strategic initiatives, operating highlights and recent developments, and will provide an update on its product and market development plans and outlook, followed by a question and answer session.

The presentation will be led by Avi Reichental, President and Chief Executive Officer, and will feature comprehensive presentations by key members of the company's senior management team. The presentation is expected to be approximately 2 hours and will be available via live webcast.

After the presentation, the company also invites attendees to visit the 3DS booth (#408) at the Atlantic Design & Manufacturing show at the Jacob K. Javits Convention Center in New York where it will showcase its 3D content-to-print solutions, from perceptual devices and software to design and manufacturing 3D printers and parts.

Investor Event Registration:

Advance registration is required for the event and space may be limited. To register to attend in person, use the online registration link available under the [Investor Relations](#) section of 3DS' web site, or go directly to the registration page by clicking on or pasting the following link in your web browser:

www.3dsystems.com/investor/2014_investor_and_analyst_day.

For remote participants, a live audio webcast of the analyst and investor day presentations will be available on 3DS' web site under [Investor Relations](#). No pre-registration is needed for the webcast, however, participants are encouraged to visit the web site a few minutes before the start to join the webcast and download any necessary software.

For more information please contact Stacey Witten at (803) 326-4010 or via email at Stacey.Witten@3dsystems.com.

Forward-Looking Statements

Certain statements made in this release that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the company to be materially different from historical results or from any future results or projections expressed or implied by such forward-looking statements. In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in the conditional or future tenses or that include terms such as "believes," "belief," "expects," "estimates," "intends," "anticipates" or "plans" to be uncertain and forward-looking. Forward-looking statements may include comments as to the company's beliefs and expectations as to future events and trends affecting its business and are necessarily subject to uncertainties, many of which are outside the control of the company. The factors described under the headings "Forward-Looking Statements," "Cautionary Statements and Risk Factors," and "Risk Factors" in the company's periodic filings with the Securities and Exchange Commission, as well as other factors, could cause actual results to differ materially from those reflected or predicted in forward-looking statements.

About 3D Systems

3D Systems is a leading provider of 3D printing centric design-to-manufacturing solutions including 3D printers, print materials and cloud sourced on-demand

custom parts for professionals and consumers alike in materials including plastics, metals, ceramics and edibles. The company also provides integrated 3D scan-based design, freeform modeling and inspection tools and an integrated 3D planning and printing digital thread for personalized surgery and patient specific medical devices. Its products and services replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce functional parts and assemblies, empowering customers to manufacture the future.

Leadership Through Innovation and Technology

- 3DS invented 3D printing with its Stereolithography (SLA) printer and was the first to commercialize it in 1989.
- 3DS invented Selective Laser Sintering (SLS) printing and was the first to commercialize it in 1992.
- 3DS invented the Color-Jet-Printing (CJP) class of 3D printers and was the first to commercialize 3D powder-based systems in 1994.
- 3DS invented Multi-Jet-Printing (MJP) printers and was the first to commercialize it in 1996.

Today its comprehensive range of 3D printers is the industry's benchmark for production-grade manufacturing in aerospace, automotive, personalized surgery, medical devices and a variety of consumer, electronic and fashion accessories.
