

3D Systems Dental Solutions

Integrated Solutions
for Dental Applications

Unlock the Power of 3D Printing

With 3D Systems Digital Dentistry Solutions, dental labs can efficiently straighten, protect, repair, and replace with high precision. 3D printing enables the production of custom prosthetics - such as crowns, bridges, and aligners - that provide a precise fit, enhanced durability, and cost-effective results.

Our innovations streamline workflows create trusted durability, and enable faster, more reliable solutions for diverse patient needs.

Trusted in **additive manufacturing** across multiple industries, 3D Systems' innovations build a strong foundation for your business' success.

For Dental Labs and Clinics

Our validated workflows and materials improve production efficiency, reduce labor costs, and expand service offerings for dental labs and clinics, allowing businesses to scale and stay competitive.

For Clinicians

Our advanced 3D printing solutions enable clinicians to provide customized, high-quality restorations faster, improving treatment workflows and patient satisfaction.

For Patients

By leveraging industry-leading materials and digital workflows, we ensure better-fitting, longer-lasting, and more aesthetic dental solutions, ultimately enhancing patients' confidence and quality of life.

Materials that
integrate with
industry-leading
3D printers

Our Solutions start with our Software

3D Systems' proprietary 3D Sprint® software streamlines preparation, optimization, and production management, providing efficiency and precision while reducing reliance on high-cost external software.

Whether designing orthodontic models, dental prosthetics, or surgical guides, our software enables seamless integration with dental workflows.

3D Sprint®

Industry-leading Materials Portfolio

With the largest portfolio in the industry, our materials are engineered for superior performance, patient comfort, and longevity.

Our materials integrate seamlessly with a wide range of industry-leading 3D printers, setting a new standard in digital dentistry.

NextDent® Materials Portfolio Compatibility

Did you know NextDent® materials are validated on many competitor printers?

Compatibility Chart

NextDent 5100

High-speed dental solution addressing the broadest range of applications with NextDent 3D printing materials

Applications	Full range of dental applications
---------------------	-----------------------------------

Max Build Area (mm)	125 x 70 x 196
----------------------------	----------------

Price Point	\$
--------------------	----

NextDent LCD1

Small sized easy-to-use 3D printer

Applications	Full range of dental applications
---------------------	-----------------------------------

Max Build Area (mm)	128 x 80 x 140
----------------------------	----------------

Price Point	\$
--------------------	----

NextDent 300

Industry's first solution for multi-material, monolithic dentures

Applications	Monolithic dentures
---------------------	---------------------

Max Build Area (mm)	294 x 211 x 50
----------------------------	----------------

Price Point	\$\$
--------------------	------

DMP Flex 200

Professional and precise metal 3D printer with 500W laser source

Applications	RPD's, crowns, bridges, implant bars
---------------------	--------------------------------------

Max Build Area (mm)	140 x 140 x 115
----------------------------	-----------------

Price Point	\$\$\$
--------------------	--------

PSLA 270

High-resolution printer that merges the speed and production grade material benefits of light projection technology with the repeatable, high-quality outcomes of SLA

Applications	Models for thermoformed aligners
---------------------	----------------------------------

Max Build Area (mm)	242 x 265 x 300
----------------------------	-----------------

Price Point	\$\$
--------------------	------

SLA 750

High-speed, projector-based SLA solution designed for time-sensitive and high part volume production

Applications	Models for thermoformed aligners
---------------------	----------------------------------

Max Build Area (mm)	750 x 750 x 550
----------------------------	-----------------

Price Point	\$\$\$
--------------------	--------

SLA 825 Dual

Industry's most advanced SLA prototyping and manufacturing solution for high-performance applications

Applications	Models for thermoformed aligners
---------------------	----------------------------------

Max Build Area (mm)	830 x 830 x 550
----------------------------	-----------------

Price Point	\$\$\$
--------------------	--------
